General qualitative disclosure requirement

A committee of Board of Directors regularly oversees the Bank's Risk Management policies/practices under various risks viz. credit, operational, market, etc. The Bank also has separate committees comprising of top executives of Bank, headed by Managing Director & CEO and Executive Directors, such as Asset Liability Management Committee, Credit Risk Management Committee and Operational Risk Management Committee. These committees meet at regular intervals to assess and monitor the level of risk under various operations and initiate appropriate mitigation measures wherever necessary.

The Risk Management Department at Central Office headed by the Chief Risk Officer measures, controls and manages risk within the limits set by the Board and enforces compliance with risk parameters set by the committees. The Chief Risk Officer is assisted by a team of Deputy General Managers, Assistant General Managers, Chief Managers, Senior Managers and Managers.

Risk Managers are posted at all Zonal offices who act as extended arms of Risk Management Department of Central Office. Risk Managers have also been identified at Regional Offices.

The Bank has in place detailed policies such as Credit Risk Policy, Credit Risk Mitigation and Collateral Management Policy, Intra Group Transactions and Exposure Policy, Credit Review Policy, Credit Rating Policy, Model Validation Policy, Model Risk Policy, Integrated Risk Management Policy, ALM Policy, Market Risk Policy, Fraud Risk Management Policy, Operational Risk Management Framework (ORMF), ESG Policy and ERM Policy, etc.

Besides these, the Loan Policy prescribe the parameters governing loan sourcing, guidelines on appraisal and evaluation of credit proposals, lending powers of delegated authorities, exposure norms and prudential limits.

Credit Monitoring department headed by a General Manager monitors the loan portfolio, identifies Special Mention Accounts and takes corrective measures. Loan Review Mechanism is implemented by the department apart from managing of accounts under CDR mechanism.

Dynamic Review of Rating for all accounts with exposure above Rs.300 Cr and Internal Credit Rating of CBI VII & below is also undertaken at half yearly interval. Further, Dynamic Review of accounts with exposure of Rs.5 Cr and above is undertaken as and when any early warning signal generates. Credit monitoring policy prescribes the methodology for monitoring and supervising the credit portfolio.

The Bank has introduced rating models for different segments of borrowers including retail lending schemes which measure the risks associated with counterparties and helps in making lending and pricing decisions. In case of large borrowers, credit risk assessment models evaluate financial risk,

Industry risk, Management risk and Business risk of the counter party. Conduct of account is also factored in for arriving at an overall rating of the counter party. If parental support as corporate guarantee is available, it is also factored in. To assess the risk return trade off, RAROC is computed and used in decision making.

Table DF-3
Credit risk: General disclosures for all banks

Qualitative Disclosures

Credit risk

Impaired:

The Working Group to review the existing prudential guidelines on restructuring of advances by banks/financial institutions in its report dated 20.07.2012 observed that as per international accounting standards, accounts are generally treated as impaired on restructuring and recommended that similar practice should be followed in India. Ind AS 109 contains guidance on the recognition, derecognition, classification and measurement of financial instruments including impairment and hedge accounting

A Non-Performing Asset shall be a loan or an advance where-

- (i) Interest and/or instalment of principal remain overdue for a period of more than 90 days in respect of a Term Loan.
- (ii) The account remains out of order for 90 days
- (iii) The bill remains overdue for a period of more than 90 days in the case of Bills Purchased and Discounted
- (iv) In case of advances granted for Agricultural purposes
 - a) The instalment of principal or interest thereon remains overdue for two crop seasons for short duration crops
 - b) The instalment of principal or interest thereon remains overdue for one crop season for long duration crops
- (v) The amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitization transaction undertaken in terms of guidelines on securitization dated February 1, 2006.
- (vi) In respect of derivative transactions, the overdue receivables representing positive mark to- market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.

Out of Order:

An account should be treated as “Out of Order” if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power, or in cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of balance sheet or credits are not enough to cover the interest debited in the account during the same period.

Overdue:

Any amount due to a bank under any credit facility is overdue if it is not paid on due date fixed by the bank.

Credit Risk Management Policy

The Bank has put in place a well-articulated Board approved Credit Risk Policy which is reviewed annually. The policy deals with the following areas:

- Credit risk- definition, Policy and strategy
- Risk identification & measurement,
- Risk grading and aggregation,
- Credit risk rating framework and reporting,
- Risk control and portfolio management,
- Mitigation techniques,
- Target markets and type of economic activity,
- Credit approval authority,
- Country and currency exposure,
- Maturity patterns, level of diversification,
- Cyclical aspect of the economy,
- Credit risk in off balance sheet exposure,
- Credit risk monitoring procedures
- Managing of credit risk in interbank exposure,
- Country risk and other operational matters

<p><u>Qualitative disclosures</u></p> <p>The Bank has a well-defined Market Risk Management Policy. This policy covers all important areas of market risk measurement.</p> <p>Bank defines Market Risk as the risk of loss in on-balance sheet and off-balance sheet positions arising from movements in market rates, in particular, changes in interest rates, exchange rates and equity and commodity prices.</p> <p>The Bank has adopted Standardized Duration Approach for measuring the capital requirements for market risk as prescribed by RBI.</p>

Policies for management of Market Risk:

The Bank has put in place Board approved Market Risk Management Policy for effective management of Market Risk in the Bank. Other policies which also deal with Market Risk Management are Integrated Treasury Policy and Asset Liability Management Policy.

The policies set various prudential exposure limits and risk limits for ensuring that the operations are in line with Bank's expectations of return through proper Market Risk Management and Asset Liability Management.

Asset-Liability Management

The ALM Policy is framed as per the extant regulatory guidelines and is approved by the Board of Directors. The Policy is reviewed periodically to incorporate changes as required by regulatory stipulation or to re-align with changes in the economic landscape. The ALCO of the Bank approves and reviews strategies and provides guidance for management of liquidity risk and interest rate risk within the framework laid out in the ALM Policy. The Risk Committee of the Board has an oversight on the ALCO.

Liquidity Risk

Liquidity Risk is measured using flow approach & stock approach. Flow approach involves comprehensive tracking of cash flow mismatches. Stock approach involves measurement of critical ratios in respect of liquidity risk.

Further, Bank has also adopted the Basel III framework on liquidity standards and has put in place requisite systems and processes to enable monitoring and reporting of the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR), as per the extant regulations. The Bank has a Board approved liquidity stress framework guided by the regulatory instructions. Bank has also set up a formal contingency funding plan (CFP) that sets out the strategies for addressing liquidity shortfalls in emergency situations.

Interest rate risk

Interest rate risk is the risk where changes in market interest rates affect a bank's financial position. Changes in interest rates impact a bank's earnings through changes in its Net Interest Income (NII). Changes in interest rates also impact a bank's Market Value of Equity (MVE) through changes in the economic value of its rate sensitive assets, liabilities and off-balance sheet positions. The interest rate risk, when viewed from these two perspectives, is known as 'earnings perspective' and 'economic value perspective', respectively.

The Bank measures and controls IRRBB using both Earnings Perspective (Traditional Gap Analysis) and Economic Value Perspective (Duration Gap Analysis). These methods involve bucketing of rate sensitive assets and rate sensitive liabilities including off-balance sheet items, based on the maturity/re-pricing dates.

Operational risk**

Qualitative disclosures

Operational Risk is the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic and reputation risks. Operational Risk Management in the Bank is guided by a well-defined Operational Risk Management framework which is reviewed every year. The Bank has initiated pro-active steps to equip itself to migrate to The New Standardized approach under Operational Risk and has started collation of data pertaining to loss events including near miss event through Loss Data Management, Risk & Control Self-Assessment (RCSA), Key Risk Indicators (KRI).

The Bank has put in place SAS system for moving to The New Standardized approach.

The Bank has provided capital for operational risk as per Basic Indicator Approach. Accordingly, the capital requirement for operational risk as on 31.03.2026 is Rs. 2374.17 Crore.

**Table DF-9
Interest Rate Risk in the Banking Book (IRRBB)**

Qualitative Disclosure:	
The interest rate risk is measured and monitored through two approaches:	
1) Earning at risk (Traditional Gap Analysis) The impact of change in interest rates on net interest income is analyzed under this approach and calculated under yield curve approach. Under this approach a parallel shift of 1% is assumed both in assets and liabilities.	
2) Economic Value of Equity: Modified duration of assets and liabilities is computed separately to arrive at modified duration of equity. A parallel shift in yield curve by 200 basis point is assumed for calculating the economic value of equity.
